

What is a psychic reading?

Most of us use our basic human senses of sight, sound, touch, taste and smell to make our way through life. In a psychic reading we use natural extensions of these senses. In psychic readings we use Clairvoyance (vision), clairsentience (feeling), claircognisance (factual knowing) and clairaudience (hearing).

Ok we got the technology out of the way. I like to compare it with the helicopter from the news channel. When we use our basic human sense it is like the helicopter is on the ground, we can see just around the corner. When we use extra sensory faculties the helicopter is in the air.

Even when we are in the helicopter in the air there are limitations to how far ahead we can see but it certainly is much further, unobstructed by buildings and other objects.

I always feel that I get the next couple of steps for my clients. There are different opportunities that the clients never thought of on their own, and insights to situations with which they were struggling. Sometimes they didn't even mention these struggles to me but their guides knew about them and chimed in.

Psychic readings can be done for various situations, such as, health, interpersonal relationships, career, business, and financial matters.

In most cases the guides share practices that the clients can do after the session to calm down their nervous system and to live a more balanced life.
